How is Rittenhouse Different?

Rittenhouse Psychiatric Associates strives to deliver thorough, conscientious, evidenced - based and holistic psychiatric services to its patients. We are mindful of the over-prescription of psychiatric medications, and tailor treatment to the individual. We will work closely with your child's Psychologist, Pediatrician and School. We can generally see patients within 3-4 weeks. We provide both in-office and virtual care, and believe that there are benefits to having local providers, who understand area resources and have established relationships with local schools and Pediatricians.
